SECTION 1: INTRODUCTION

1.1 SCOPE OF THE NWCR QSEMS

Norwest Contracting and Rail Pty Ltd (hereafter referred to as NWCR) is a Pilbara-based and indigenous owned company providing construction, rail, contracting, and labour and equipment hire services throughout Western Australia.

1.2 EXCLUSIONS TO ISO 9001

7.1.5.2 Measurement Traceability – NWCR do not undertake any activities requiring the use of calibrated devices. This clause of ISO 9001 is therefore not relevant

8.3 Design and Development – NWCR work from client-supplied plans and drawings only. This clause of ISO 9001 is therefore not relevant.

1.3 INTRODUCTION TO THE NWCR QSEMS

SECTION NAME	BRIEF DESCRIPTION	SECTION HEADINGS	RELEVANT TO
1.0 INTRODUCTION	This section provides a summary of the NWCR QSEMS. This section is otherwise referred to as the <i>Quality Management System</i> in ISO 9001 (Clause 4.4)	1.1 Scope 1.2 Exclusions to ISO 9001 1.3 Introduction to QSEMS 1.4 Responsibilities 1.5 Policies and Objectives 1.6 Organisational Knowledge 1.7 Risks and Opportunities	Relevant to all Staff and Management This section is introductory only
2.0 OPERATIONS	This section is relevant to the core operations of the business	2.1 Project Services 2.2 DLP and Warranty 2.3 Calibration and Maintenance 2.4 Purchasing 2.5 Client Satisfaction and Property 2.6 Related Documents	Relevant to all Staff and Management
3.0 SAFETY & ENVIRONMENTAL MANAGEMENT	This section is relevant to the safety and environmental management of the business and includes legal requirements such as risk management, consultation, emergency management, etc.	3.1 Risk management 3.2 Consultation and Communication 3.3 Incident Management 3.4 Emergency Management 3.5 Monitoring and Measurement 3.6 Related Documents	Relevant to all Staff and Management, but mainly Site Management and Management Representative
4.0 SYSTEM MANAGEMENT PROCEDURES	This section covers how NWCR manages the QSEMS in accordance with the requirements of ISO 9001, ISO 45001 & ISO 14001 e.g. document control, internal audits, etc. This section also includes our processes for Human Resource Management	4.1 Non-Conformances and Continuous Improvement 4.2 Document Control 4.3 Records Control 4.4 Human Resources 4.5 Internal Audits 4.6 Meetings 4.7 Related Documents	Particularly relevant to the Management Representative. Reporting non-conformances is relevant to all Staff and Management.

1.4 RESPONSIBILITIES

1.4.1 MANAGEMENT REPRESENTATIVE

The Management Representative for our QSEMS is currently Zoe Garland.

The role of the Management Representative is to ensure the NWCR QSEMS is developed and maintained, and to regularly report the effectiveness of this Management System to Management. Among the roles of the Management Representative therefore is the management of internal audits and reporting audit results. (See sections 4.5 and 4.6).

1.4.2 SENIOR MANAGEMENT COMMITMENT

Senior Management is committed to maintaining and improving this QSEMS in order to continually satisfy clients by providing them with service that meets their requirements. Senior Management is accountable to all interested parties for the performance of the company and the effectiveness of the QSEMS and to ensure that client and applicable statutory and regulatory requirements are determined, understood, and consistently met.

Senior Management ensures that client requirements are met with the intention of enhancing client satisfaction. This commitment is demonstrated by the development and implementation of this QSEMS, by formulating the Quality, Safety, and Environmental Policies, and by establishing any objectives against which system performance is evaluated and acted upon in an effort to improve processing and the resulting services. Senior Management ensures that all personnel understand the importance of meeting requirements, particularly those of our clients. Senior Management encourages all personnel to engage in improvement activities that would improve system effectiveness and efficiency.

Senior Management also demonstrates a commitment to quality by conducting periodic reviews of the QSEMS and its' processes (during Management Review Meetings). Based on factual information regarding performance and other feedback from clients, and in consideration of future client needs, Senior Management allocates resources as necessary to ensure conformity of service, to improve the QSEMS, its processes, and resulting service, in order to promote client satisfaction.

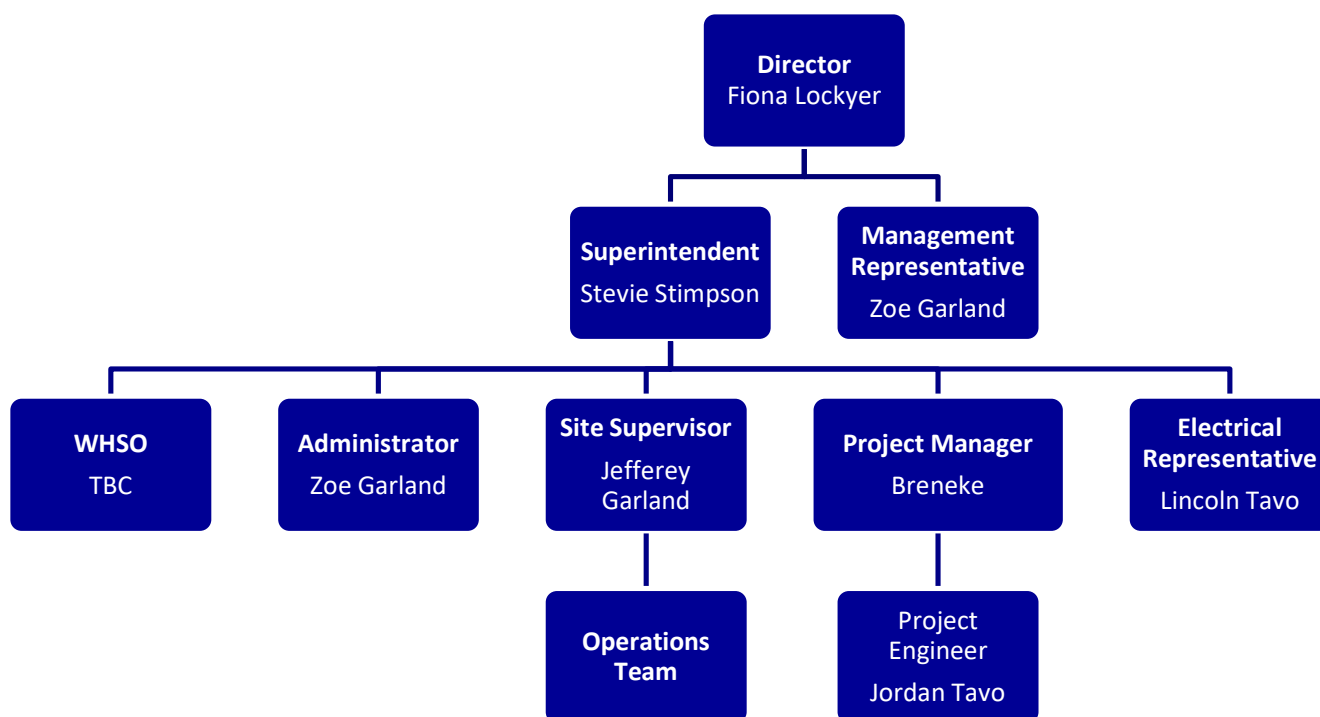

Finally, Senior Management demonstrates leadership and commitment to quality by systemically applying plan-do-check-act (PDCA) to the system and its processes. The QSEMS applies a process approach to quality management, integrating QSEMS requirements into our business processes, whether primary or support.

Risk-based thinking is applied as part of the process approach to ensure operations are not only effective, but effectively and efficiently managed. Accordingly, our QSEMS is viewed and documented as a system of processes satisfying clients, and a system effectively managing risks that would result in unsatisfactory performance.

1.4.3 ORGANISATIONAL CHART

Positions at NWCR are graphically presented in the organisational chart below.

Responsibilities for the positions that are relevant to the QSEMS are described in the body of the NWCR QSEMS.

1.5 POLICIES AND OBJECTIVES

1.5.1 QUALITY POLICY

POLICY STATEMENT

NWCR operates in a manner that consistently meets or exceeds the quality standards set by our stakeholders. To achieve this, we are committed to continuous improvement of our management systems, operations, and the products and services provided by our company.

AIMS AND OBJECTIVES

We recognise that the quality of our products and services are determined by our client's needs and expectations. Our objectives are to:

- Identify the changing needs and expectations of our clients
- Develop and maintain processes and procedures that ensure that these changes are accommodated
- Achieve efficiency in our operations, attention to detail, and responsiveness to client priorities
- Provide an employment environment where continuous improvement is fostered and encouraged

RESPONSIBILITIES

Company

We, as a company will:

- Train all employees and contractors to identify areas where improvement can be achieved
- Remove wasted and non-value-added steps and time in our processes where feasible
- Strive to ensure that client and stakeholder satisfaction is achieved at all times, and in all things
- Support the adoption of appropriate quality systems and management principles in order that all stakeholders benefit from this commitment to quality

Employees

Employees are expected to:

- Assist and cooperate in ensuring that this policy is followed
- Actively participate in the adherence of this company to the achievement of the goals and objectives of this policy

Fiona Lockyer

Director

Norwest Contracting and Rail Pty Ltd

1.5.2 WORKPLACE HEALTH & SAFETY POLICY

POLICY STATEMENT

As part of our commitment to achieving the principles of health and safety in our workplace, we recognise our moral and legal responsibility to provide a safe and healthy work environment for workers, contractors, clients, and visitors for the prevention of work-related injury and ill health. This commitment also extends to ensuring that our operations and activities do not place the local community or environment at risk of injury, illness, or damage.

AIMS AND OBJECTIVES

We will adopt procedures to:

- Provide and maintain healthy and safe workplaces, safe equipment, and systems of work
- Provide written procedures and instructions to ensure safe work practices
- Eliminate hazards, and reduce risks wherever possible
- Ensure compliance with legislative duties and current industry standards
- Provide such information, instruction, training and supervision to employees, subcontractors and clients as is necessary to ensure their continued health and safety
- Provide support and assistance to employees and involve them in consultation on safety issues

RESPONSIBILITIES

We recognise that the overall responsibility to provide a safe workplace rests with Management, who will be accountable for the implementation of this policy. These responsibilities include:

- Ensuring that all WHS policies and procedures are implemented
- Continual improvement of our Management Systems
- Establishing measurable objectives and targets to ensure continued improvement aimed at the elimination of work-related injuries and illnesses
- Providing adequate resources to meet these WHS commitments

Employees also have responsibilities, which include:

- Following all WHS policies and procedures
- Recognising hazards which may affect the health and safety of themselves, others, or the environment

We are committed to encouraging consultation, participation and co-operation between Senior Management and employees, and will formally involve elected Health and Safety Representatives in any workplace change or any matters that may affect the health and safety of workers.

Fiona Lockyer

Director

Norwest Contracting and Rail Pty Ltd

1.5.3 ENVIRONMENTAL POLICY

POLICY STATEMENT

As part of our commitment to achieving the principles of responsible environmental management, sustainability and protection of the natural environment in our workplace, we recognise our moral and legal responsibility to ensure that our activities, equipment, materials and services are designed to protect and enhance the environment in the communities in which we operate, and our obligations to ensuring that our operations do not place the natural environment or the local community at risk of harm.

AIMS AND OBJECTIVES

We are committed to environmental improvement and prevention of pollution. We will achieve this by working with our stakeholders to adopt procedures that:

- Reduce waste through innovative work practices and recycling practices
- Minimise environmental impacts by reduction of polluting substances produced by our operations, activities, materials, or services
- Minimise the impact of our operations on the neighbouring community
- Increase the use of environmentally acceptable materials, equipment, and technology in place of those which are considered harmful
- Ensure that our suppliers follow acceptable environmental policies
- Actively promote environmental awareness among employees, clients, and the general public

RESPONSIBILITIES

We recognise that the overall responsibility environmental sustainability rests with Management, who will be accountable for the implementation of this policy. These responsibilities include:

- Ensuring that all environmental policies and procedures are implemented
- Establishing measurable objectives and targets to ensure continued improvement aimed at the elimination of waste, pollution, and environmental harm
- Continual improvement of our Management Systems
- Encouraging consultation and co-operation between Management, employees and stakeholders in matters which may affect or impact on the environment
- Providing adequate resources to meet these environmental commitments

Workers also have responsibilities, which include:

- Following all environmental policies and procedures
- Recognising and reporting hazards which may affect the health and well-being of the environment

Fiona Lockyer

Director

Norwest Contracting and Rail Pty Ltd

1.5.4 COMPANY OBJECTIVES

NWCR has the following Quality, Safety and Environmental Objectives:

QUALITY OBJECTIVES

- Achieve and maintain ISO 9001:2015 certification by 21/02/2025
- Zero quality errors in quoting/presales and tender documentation
- Consider an objective around timeframes and costs (DIFOT)
- Target new clients who have ISO prerequisites
- Complete an annual review with every NWCR Team Member to evaluate KPI's and ensure Employee satisfaction with regards to company policies, procedures, and work environment
- Gather baseline data from the Continuous Improvement Register so as to formulate further meaningful objectives by 01/06/2025

SAFETY & ENVIRONMENTAL OBJECTIVES

- Achieve and maintain ISO 45001:2018 and ISO 14001:2015 certification by 21/02/2025
- Identify competency gaps and maintain current competencies through proper training and supervision
- Ensure General Inductions.
- Zero lost time injuries (LTIs) and incidents for 2024 by ensuring strict adherence to safety policies and procedures, including proper use of PPE, through proper supervision and training
- Ensure that all near misses are reported and recorded on the Continuous Improvement Register
- Zero breaches of the Safety and Environmental Risk Register
- All SWMS reviewed biannually with applicable personnel project
- Minimum of 1 First Aider present, per project
- Ensure 100% return of completed SWMS and pre-starts/toolbox records for each project
- Zero notices from WorkSafe or EPA
- Maintain a minimal environmental impact through:
 - Using energy efficient lighting
 - Recycling all waste materials where practicable

It is the responsibility of the Management Representative to work with staff to ensure that these objectives are met within the timelines stated where possible. Objectives are reviewed frequently for progress and continuing suitability, and where needed or appropriate, new objectives will be added by the Management Representative in consultation with other staff as required.

When establishing objectives, NWCR will ensure that they are specific, measurable, and achievable, and will have a time frame and responsibility established for compliance.

Fiona Lockyer

Director

Norwest Contracting and Rail Pty Ltd

1.6 ORGANISATIONAL KNOWLEDGE

Responsibility: Senior Management

Organisational knowledge is considered a critical aspect of ensuring that products and services can meet the requirements of clients and provide the needed value and assurance to achieve intended results. Knowledge is communicated and shared throughout the organisation as needed. Knowledge can include but is not limited to:

- Policies and procedures
- Standards and guidelines, both internal and those acquired from third party sources (external documents, such as Australian standards or codes of practice)
- Meetings and knowledge-sharing events
- Conferences and industry events
- Personnel knowledge and expertise

Knowledge is considered during the Management Review Meeting when discussing resource needs.

1.7 RISKS AND OPPORTUNITIES

Responsibility: Senior Management

During Management Reviews and Strategic Planning (Section 4.6.1) and when planning and improving the QSEMS, NWCR considers internal and external issues relevant to its purpose and strategic direction. This is done through thoughtful discussion and review of information regarding the context of the organisation and determining who the interested parties are and identifying their unique requirements. The main goals of these evaluations shall address the following questions:

- Can we give assurance that the QSEMS can **achieve its intended results**?
- Does the QSEMS **enhance desirable effects**?
- Does the QSEMS **prevent, or reduce, undesired effects**?
- Does the QSEMS **achieve and facilitate improvement**?
- Have the **risks and opportunities that can affect conformity of products and services and the ability to enhance client satisfaction been determined and addressed**?

Action found necessary during the Management Review or Strategic Planning Meeting that will address identified risks and opportunities and the improvement of the QSEMS, are recorded on the Management Meeting Review Agenda/Strategic Planning Meeting Form and Continuous Improvement Register. These are to be followed up on by Senior Management during regular meetings and evaluated in subsequent Management Reviews.

Action may include:

- Updating or revising the QSEMS to reduce or prevent risk or capitalise on new opportunities
- Resource allocation to pursue opportunities that may enhance desirable effects or achieve improvement
- Acquiring additional knowledge or training
- Developing new ways to serve clients or employees
- Using new technology or better systems, etc.

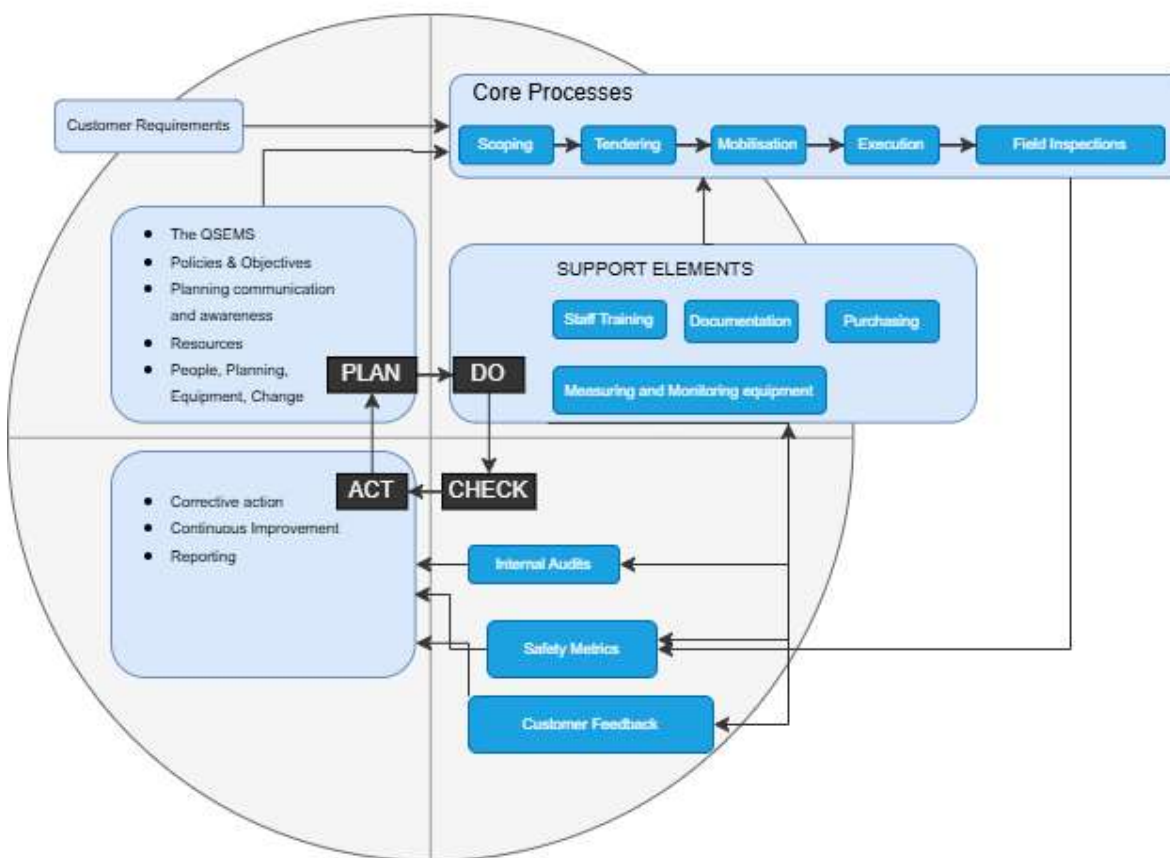

Risks and opportunities relevant to the organisation and the QSEMS are also identified less formally throughout regular operations and management meetings. As these are identified and reported to Senior Management, action determined to be necessary may be assigned by Senior Management using the Continuous Improvement Register. These actions are tracked ongoing throughout regular meetings and management evaluation.

1.8 QSEMS COMPLIANCE

In accordance with the requirements of ISO 9001:2015, ISO 45001:2018 and ISO 14001:2015, NWCR has established, documented, implemented this QSEMS, which includes needed processes and their interactions, and will continue to maintain and improve it by ensuring the principles of continual improvement are embedded throughout the organisation.

1.8.1 INTERACTION OF PROCESSES AND CLAUSE MATRIX

The processes of NWCR are referenced in the clause matrix below, as they relate to the relevant clauses of ISO 9001:2015, ISO 45001:2018 and ISO 14001:2015. A model for the interaction of these processes is presented below. This interaction model is taken directly from ISO 9001:2015.

1.8.1.1 ISO 9001 CLAUSE MATRIX

ISO 9001:2015 Clause Reference	Where addressed in the QSEMS

10.3 Continual Improvement	4.1 Non-Conformances and Continuous Improvement 4.5 Internal Audits 4.6.1 Management Review Meeting

SECTION 2: OPERATIONS

2.1 PROJECT SERVICES

2.1.1 INITIAL CONTACT

Responsibility: Senior Management

The majority of project work undertaken by NWCR is by incoming enquiries, maintaining existing client relationships and contracts, referrals, and some tendering. All incoming enquiries are handled by Senior Management to determine requirements. These are generally received by email/web portal, and would typically include:

- Client details
- Scope of work and deliverables
- Location/s and timeframes
- Mobilisation and demobilisation requirements
- Site plans and drawings
- WHSE requirements and inductions
- Special conditions, such as site access, and project-specific requirements such as permits or approvals

Site inspections are then conducted, where needed, to determine site conditions and other relevant project information. A review is then conducted by Senior Management to determine the eligibility of NWCR to bid on the project, and alignment with strategic objectives.

2.1.2 QUOTING AND TENDERING

Responsibility: Senior Management

If it is established that the company is able to meet all the specified requirements, the **project is then created** within the relevant platforms, and the tender requirements are completed by Senior Management.

The tender process would generally include:

- Scope, drawings, and specifications are reviewed, and risk assessments are conducted
- Proposed contract terms are reviewed and assessed
- Tender documents and costing are prepared, in consultation with relevant third parties as required
- A review is undertaken of the tender response documents and costing, with revisions discussed and appropriately incorporated
- The tender response submission is issued to client

Throughout this tendering process, where specified requirements are unclear, any clarifications, variations, or issues, both before submission of the tender response and after receipt of the written acceptance, are handled accordingly in mutual consultation with Senior Management and the client as required. This is generally in writing, the records for which are stored in the project folder.

Note: For non-tendered projects, NWCR follows a simplified version of the above processes, including a formal quote. The work must be within the company's core capability, and with the sectors/industries serviced.

2.1.3 CLIENT ACCEPTANCE

Responsibility: Senior Management

For acceptance of Quotes, the following applies:

- **Written acceptance is generally received** by way of a Purchase Order

Where tenders/bids are successful:

- Contract negotiations commence
- The contract or purchase order is reviewed by Senior Management, and differences, if any, between these and the original submission are mutually resolved
- **Contracts/Awards are then formally executed**

2.1.4 SCHEDULING

Responsibility: Senior Management/Operations Superintendent/Project Coordinator

Methodologies for project scheduling and service delivery are dependent upon the size, complexity, and scope of work, and individual client requirements.

Senior Management, however, generally ensure the following activities are carried out by appointed personnel, upon receipt of acceptance:

- The Project Team are allocated and briefed
- The required project phases are planned
- **Timeframes for each project phase are documented**, and the **project is scheduled** accordingly
- All relevant client, Government and legislative requirements are identified
- **The Project folders are created and populated** with required documentation, such as:
 - Project details
 - SWMS and Risk Assessments
 - Project and Management Plans
 - Requirements for high-risk work, including relevant tickets and licenses
 - Mobilisation requirements
- **Timeframes are confirmed** with the client
- Appropriate resources are allocated, including all necessary materials, equipment, and personnel (where work must be performed for which NWCR is not qualified or able, relevant subcontractors will be engaged to complete the work)
- **Subcontractor Agreements and Checklists** are submitted, including requirements to submit SWMS/Risk Assessments for review, prior to commencement of their specific role in the project, where applicable

2.1.5 PROJECT DELIVERY

Responsibility: Operations Superintendent/Project Coordinator/Operations Team/Project Team

It is the responsibility of Operations Superintendent to ensure that the following steps occur for the successful completion of each project, with the involvement of other staff and Management as required:

- Site establishment, inductions, and other and safety meetings, as applicable
- **Project services are completed as per client/project specifications by qualified, appointed personnel**, in accordance with relevant legislative requirements and industry standards
- **Monitoring, measuring, and reporting requirements** are carried out ongoing by Senior Management to ensure completed work conforms to requirements
- Project deliverables are completed and submitted, as per specified requirements
- Demobilisation requirements are met, as applicable
- **Daily Work Sheets are completed** and submitted, where specified by the client
- **Weekly and Monthly Reports are completed** and submitted, where specified by the client
- Senior Management submit invoices and progress claims, including final claims, at determined intervals as stipulated by the contract, purchase order or agreement.

Variations, if any, are handled by Senior Management, in consultation with the client as required and records maintained in the project folder.

2.1.6 PROJECT COMPLETION

Responsibility: Senior Management

As part of completion, the following activities are carried out where/as contractually specified:

- A walkthrough and defects inspection are conducted with the client
- Defect rectification, as applicable
- Completion and submission of **relevant documentation**, such as Work Sign-Off Sheets and ITPs, as specified by the client/contract

2.2 DLP AND WARRANTY

Responsibility: Senior Management

NWCR provides guarantees of service delivery to contract/project specifications. Furthermore, warranty and defects liability periods exist, in accordance with contract terms and legislated requirements.

Where a defect or warranty claim is initiated by the client, Senior Management determines validity of the claim and handles it accordingly, with the involvement of relevant staff and suppliers. **Defect claims and workmanship issues are reported to the Management Representative for inclusion in the Continuous Improvement Register as required.**

2.3 CALIBRATION AND MAINTENANCE

NWCR will comply with all legislative and industry standards with regards to calibration and maintenance of their equipment and vehicles, **including the maintaining of appropriate records in the Equipment & Calibration Register**. At present, there are no devices in use that require calibration/verification.

More generally, the following conditions apply:

- **Test and Tag** requirements are met by qualified personnel, as per the intervals outlined in AS/NZS 3760:2010
- Other equipment, tools and machinery are regularly checked to be in good repair and are serviced and maintained as required

It is also a requirement that externally sourced equipment meets all legislative and industry standards with regards to calibration/maintenance requirements. As such, subcontractors are responsible for ensuring the calibration and test and tag status of all equipment before use.

Any equipment, tools or vehicles found outside of specified intervals must:

- Have appropriate measures taken, such as labelling or isolation, to ensure use does not occur
- Be reported to Senior Management for appropriate corrective action and inclusion in the Continuous Improvement Register

If any equipment is found to be considerably out of calibration upon return from the external provider or upon verification performed by qualified NWCR staff and subcontractors, an investigation into the impact this may have caused previous work will commence.

If any issue is found, any corrective action taken will be reported to the Management Representative for inclusion in the Continuous Improvement Register and affected clients will be notified.

2.4 PURCHASING

2.4.1 APPROVALS AND ORDERS

Responsibility: Senior Management/Admin Team

All purchases, whether capital expenditure or project-specific, require Senior Management approval.

Subcontractors are subject to pre-qualification to ensure that relevant qualifications/licences and competencies are held. **Agreements and contracts**, stipulating company requirements and conditions of work, are **issued, signed and records kept**.

Purchases are made from approved suppliers, generally by purchase order, and reference the project/client as applicable. If under special circumstances this is not the case, receipts or invoices must be kept and submitted to the Accounts Team to **ensure traceability of the purchase**.

Suppliers are selected based on their ability to meet requirements and provide the best value for the business. As applicable, these criteria include:

- Quality of product or service and ability to meet Australian/other relevant standards or client requirements
- Safety and environmental requirements aimed at minimising personal risk or harm to the environment
- Lead time/availability/location
- Past performance with other clients
- Assessment of supplier's management systems
- Best price/performance ratio

2.4.2 GOODS INWARD

Responsibility: Senior Management/Project Staff/Admin Team

When goods are delivered, Senior Management ensure that:

- **Goods are inspected** for external damage
- **Goods are checked against the delivery docket/invoice** to ensure consistency
- **Goods are signed for**, and relevant **paperwork submitted to the Admin Team for processing** and allocation to project
- **Goods are placed in the allocated area**

Any issues with regards to purchasing, including supplier/subcontractor performance issues and wrongly purchased or faulty/damaged products are handled as per section 4.1 – Non-conformance reporting.

2.5 CLIENT SATISFACTION AND PROPERTY

2.5.1 CLIENT COMMUNICATION AND COMPLAINTS HANDLING

Responsibility: All Staff and Management

NWCR understands the importance of client feedback in determining perception as to whether or not requirements have been met. Information gathered (both positive and negative) is therefore recorded and reviewed by Management with the aim of increasing client satisfaction. Satisfaction is determined as follows:

- Meetings with clients, particularly throughout projects
- Lost and repeat business analysis at client acceptance stage (generally informal)
- Regular informal (phone/email) feedback from stakeholders
- Formalised complaint handling and procedures for all issues via the Continuous Improvement Register

All noteworthy complaints raised, and compliments given by clients must be reported to the Management Representative for inclusion in the Continuous Improvement Register.

2.5.2 CLIENT AND EXTERNAL PROVIDER PROPERTY

Responsibility: All Staff and Management

NWCR handle external provider property throughout project delivery, where company policies govern all handling requirements. All staff must ensure that appropriate care is taken to ensure that damage, loss, or mishandling/misuse does not occur.

If a noteworthy complaint is established by a client or external provider, including complaints regarding damage or loss of property, it is the responsibility of affected staff and Management to resolve the complaint and report back the results to the client in a timely manner.

All such reports and activities must also be reported to the Management Representative for inclusion in the Continuous Improvement Register.

2.6 OPERATIONS – RELATED DOCUMENTS

The following documents are used in conjunction with this section of the NWCR QSEMS to ensure its effective implementation and operation:

DOCUMENT NAME	LOCATION

Workplace inspection	Company Drive\07_Safety\NWCR - Workplace Inspection Checklist.docx
SWMS Template	Company Drive\06_Resources\01_Templates\NWCR-SWMS-Template.DOCX

SECTION 3: SAFETY & ENVIRONMENTAL MANAGEMENT

3.1 RISK MANAGEMENT

Scope: Safety and environmental risk assessments at NWCR will be performed taking into account:

- Workload and work hours
- Routine and non-routine activities
- Past incidents
- Potential emergency situations
- New knowledge of risks, hazards, and aspects
- Activities of all persons who have access to the workplace
- Human behaviour, capabilities, and other human factors
- Hazards and aspects originating from outside of the workplace that could affect personnel
- Hazards and aspects created by the work of NWCR
- The infrastructure, equipment, and materials at NWCR
- Changes or proposed changes in the organisation's activities and materials
- Modifications to the QSEMS
- Any applicable legal obligations
- The design of work areas, processes, installations, equipment, operating procedures and work organisation, including their adaptation to human capabilities

Environmental risk assessments will be performed taking into account NWCR activities, products and services, those that can be controlled and those that can be influenced, considering the life cycle perspective. The risk assessments will take into account change, including planned or new developments and abnormal conditions and reasonably foreseeable emergency situations.

Note: NWCR will comply with the client's site-specific safety plans, including any inductions, where provided. All other company procedures regarding safety are maintained, implemented, and communicated to Staff by Senior Management, the Operations Superintendent or Site Supervisor.

3.1.1 SITE RISK ASSESSMENTS

Responsibility: Senior Management/Project Team

Safety and environmental documentation relevant to the project is prepared as stipulated by contract and company policy. The documentation outlines how Site Supervisors will manage Health, Safety and Environmental requirements for employees, sub-contractors, suppliers, visitors, and the general public, and covers all work activities required to complete the project. The level of detail expected in these documents is dependent upon the size and complexity of the proposed project and individual client requirements.

Safety Pre-Start Meetings and inductions are held covering all safety, environmental and general requirements for the project, where required.

A JHA is typically completed for each project. Furthermore, all applicable SWMS must be completed for high-risk activities by all Project Staff, and the identification of any areas of concern with regards to safety and the environment that fall outside of normal operating procedures already detailed in the JHA/SWMS are recorded as follows:

1. Site-specific hazards, risks and environmental aspects are identified and recorded on the JHA/SWMS
2. The risk levels are determined based on the likelihood/consequence matrix detailed below (Table 1)
3. If the risk is considered acute, high, or medium, control measures to help reduce risk to the lowest possible levels are identified and recorded in the section labelled recommended actions. Control measures can also be added if the risk was assessed as low as reasonably practicable. Control measures will be considered in the following hierarchical order (Consider the higher levels of control e.g. eliminate the hazard before considering the lower levels of control mentioned – See also Table 3 below):
 - a. Eliminate the hazard
 - b. Substitute the hazard with a safer solution
 - c. Isolate the hazard as much as possible away from workers
 - d. Engineering controls e.g. guarding
 - e. Administrative (procedural) controls e.g. signage, safety procedures, etc.
 - f. Personal protective equipment (PPE)
5. The residual risk is determined as per the likelihood/consequence matrix below (Table 1). Further controls may need to be added to the JHA/SWMS depending on the table of priorities below (Table 2)
6. Any safety concerns must be addressed before commencing work in affected areas. This is generally discussed with the Site Supervisor.
7. Any issues or changes to the JHA/SWMS will be reported to the Operations Superintendent or Site Supervisor and the issue resolved. If the JHA/SWMS needs to be changed, the Operations Superintendent or Site Supervisor will authorise the relevant changes to be made as suggested

Upon review and approval of the JHA/SWMS by Project Staff, the revised JHA/SWMS will be signed off by Project Staff. If the need to change a JHA/SWMS arises e.g. after an incident, changed legislation, new equipment, additional hazards or aspects identified, etc., the relevant parts of the above process will be repeated including sign off by Project Staff.

3.1.1.1 QUALITATIVE RISK ANALYSIS MATRIX – LEVEL OF RISK

		CONSEQUENCE				
		INSIGNIFICANT	MINOR	MODERATE	MAJOR	CRITICAL
LIKELIHOOD	ALMOST CERTAIN	Medium	Medium	High	Acute	Acute
	LIKELY	Low	Medium	High	High	Acute
	POSSIBLE	Low	Medium	High	High	High
	UNLIKELY	Low	Low	Medium	Medium	High
	RARE	Low	Low	Low	Low	Medium

TABLE 1

ASSESSED RISK LEVEL	DESCRIPTION OF RISK LEVEL	ACTIONS
LOW	If an incident were to occur, there would be little likelihood that an injury would result.	Undertake the activity with the existing controls in place.
MEDIUM	If an incident were to occur, there would be some chance that an injury requiring First Aid would result.	Additional controls may be needed.
HIGH	If an incident were to occur, it would be likely that an injury requiring medical treatment would result.	Controls will need to be in place before the activity is undertaken.
ACUTE	If an incident were to occur, it would be likely that a permanent, debilitating injury or death would result.	Consider alternatives to doing the activity. Significant control measures will need to be implemented to ensure safety.

TABLE 2

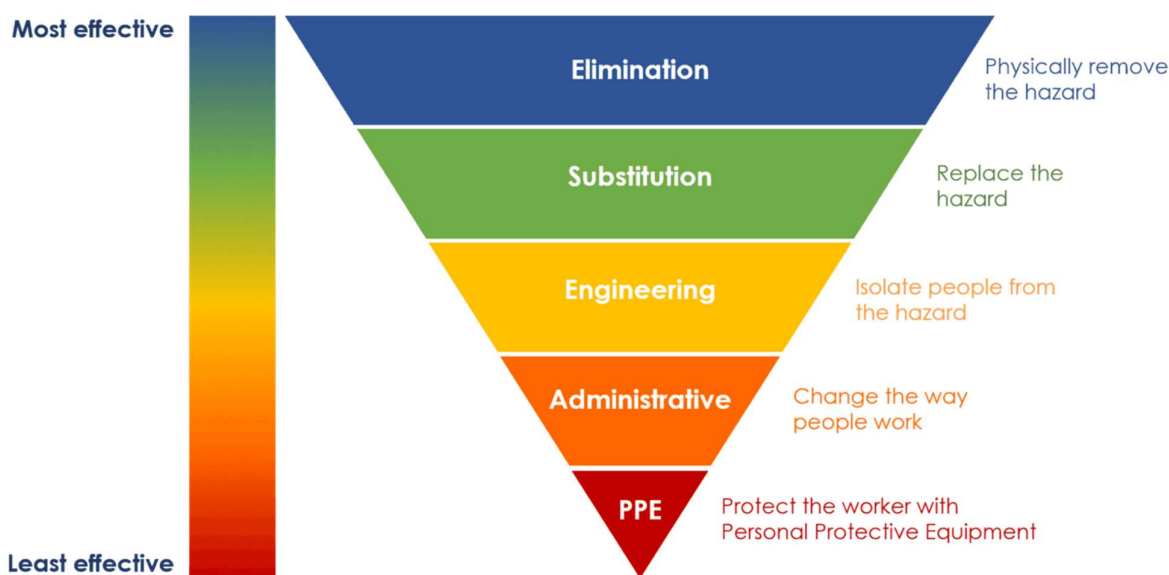

TABLE 3

3.1.2 SAFETY AND ENVIRONMENTAL RISK REGISTER

Responsibility: Management Representative

Scope: This section is relevant to the hazards and environmental aspects from the office, warehouse, and company travel

The Management Representative and at least one other employee (where possible) in the area being assessed will perform the following activities:

1. Potential hazards and aspects are identified from the office, yard, and company travel. The **Safety and Environmental Risk Register** provides a list of potential (but not exhaustive) hazards and environmental aspects that can be used as a guide. The hazards or aspects are added to the Safety and Environmental Risk Register
2. The Risk Rating is determined based on Table 1 and Table 2 from section 3.1.1.1
3. **Controls are recorded on the Risk Register** to help reduce risk to the lowest possible level. Controls will be considered in the hierarchical order shown in Table 3 from section 3.1.1.1
4. If any of the listed control measures require further action, the responsibility for action and timeframe will be identified and recorded on the Register
5. The **person responsible for monitoring** compliance with the identified controls measures is also **recorded on the Register**.

The **Safety and Environmental Risk Register** will be included as part of the induction for new employees.

If a need to change the Safety and Environmental Risk Register arises e.g. after an incident, changed legislation, new equipment, additional hazards or aspects identified, etc., the relevant parts of the above process will be repeated. Changes to the Register will be made in accordance with section 4.2.1 Internal Document Control. As per section 4.2.1, **staff and Management will be notified of relevant changes** to the Safety and Environmental Risk Register via management or by memo/email.

Furthermore, **the Safety and Environmental Risk Register will be reviewed and signed annually** by the Management Representative and each employee. Any changes to the Safety and Environmental Risk Register will be managed as per the above processes.

Potential HAZARDS (not exhaustive)		Potential ENVIRONMENTAL ASPECTS (not exhaustive)
Weight/mass of product Machinery hazards causing: • Crushing • Shearing • Cutting or severing • Entanglement • Drawing in • Impact • Stabbing or puncture • Friction or abrasion • High-pressure fluids Electrical High voltage Thermal Hot or cold environment Noise Vibration Animals and insects	Radiation including UV Hazardous substances Biological (e.g. COVID-19) Flammable or explosive substances Ergonomics Height Falling objects Slippery floors Tripping hazards Lighting (or lack of) Dust Gases Distractions Hours of work and fatigue Traffic and travel Distance/remote working Air quality and confined spaces Repetitive tasks	Emissions to air (e.g. gas, dust, pollutants) Releases to land (e.g. contamination, disturbance of contaminated land) Use of energy Releases to water (e.g. pollutants to water or streams) Use of raw materials or natural resources Excessive rubbish to landfill Energy emissions (e.g. heat, radiation, vibration) Physical attributes (e.g. visual impact such as size, shape, colour, appearance) Damage to flora and fauna (e.g. Loss of habitat, reduction in biodiversity, spreading weeds) Nuisance (e.g. Traffic disturbance, impact on businesses, impact on parking) Heritage

3.1.3 HAZARDOUS SUBSTANCES

Responsibility: Management Representative

NWCR is committed to preventing any injury or ill health due to the use of hazardous substances in the workplace. Accordingly, Senior Management and employees ensure that:

- **A Hazardous Substance Register is maintained and audited annually**
- **Hazardous Substance Risk Assessments are conducted for each new hazardous substance**
- **Current Safety Data Sheet (SDS)** for hazardous substances, including all chemicals and fibrous material, are available, read and understood by relevant employees
- All hazardous chemicals and dangerous goods are stored in their original containers with labels intact
- Chemicals are only used for their intended or specified use, and in a safe and appropriate manner
- Safety and environmental precautions for use, transport and storage of hazardous chemicals listed on the SDS are followed
- Workers have appropriate PPE, that it is fitted correctly and well maintained when handling hazardous substances, and stored safely when not in use
- Supervisors are notified immediately when PPE is NOT provided/worn, or is unserviceable or unsuitable
- Safety signs and placards are used and adhered to, when and where required

3.1.4 PLANT AND EQUIPMENT

Responsibility: Senior Management/Operators

WHS legislation requires risks to be managed with installation, assembly, construction, commission, use, cleaning, and maintenance, decommission and dismantling of plant and equipment. NWCR will ensure that plant and equipment are used only for their designed purpose and within the manufacturer specified limitations. Competent persons (such as a licensed engineer or manufacturer representative with sufficient skills and experience) will conduct risk assessments where plant may be required to perform outside of its intended scope.

NWCR will ensure that all plant and equipment bought onto site are without risks as far as is practicable. NWCR will seek information from the designer/manufacturer in relation to risks associated with the plant so these can be assessed and controlled during this project. Where plant is hired/leased or owned by a subcontractor, the persons with management and/or control of the plant must provide the equivalent safety information before the plant/equipment is used on site.

A register of all plant/equipment used for this project will be maintained using Equipment & Calibration Register (and in NWCR approved formats for submission by subcontractors). NWCR will ensure all operators have required training and licensing and plant is registered with the Regulator where required. Details of training and licensing will be recorded in Skills Matrix.

Hazard Identification: An inspection of plant/equipment will be conducted to identify hazards before being used for the first time as part of each project. The relevant Operator will be conducting inspections before work begins using the Plant Hazard Checklist. These will be reviewed weekly by the Operations Superintendent, and updated with newly identified hazards as needed.

Risk Assessment & Control: For plant and tasks associated with the plant, that require straightforward controls a Risk Assessment will not be completed. For tasks/plant that are more complex, a Risk Assessment will be completed using the Risk Management processes outlined in Section 3.1.1. A SWMS for all “High Risk Tasks” involving plant will be developed and implemented. Specific controls in relation to Powered Mobile Plant will be documented in SWMS and will include control of:

- Roll-over risks
- Items falling onto operators
- Items being ejected from plant
- Plant colliding with other plant and/or pedestrians
- Ejection of fluid under pressure

Controls will also include matters specific to the Powered Mobile plant, such as operator protective devices, ROPS, SWL, seating, protection for permitted passengers, attachments, etc. The identification and control of these matters will be documented in Plant Hazard Checklist.

Risk controls will be maintained to ensure they are suitable for the task, installed/used correctly and they remain effective for the duration of the task. The Operators in conjunction with the Site Supervisor will be responsible for monitoring risk controls for plant and tasks associated with plant.

Competent persons, who are deemed to have the skills and experience and/or formal qualifications, to conduct the inspection/maintenance, will conduct the maintenance and inspection of plant. The persons responsible for inspection/maintenance of items of plant will be recorded in the Equipment & Calibration Register.

Inspections/maintenance on all plant will be conducted on a regular basis as instructed by the manufacturer, and at least annually. Results of the maintenance/inspection will be recorded on the individual logbook for the plant and summarised in the Equipment & Calibration Register.

3.2 CONSULTATION, PARTICIPATION AND COMMUNICATION

3.2.1 COMMUNICATION

Responsibility: Senior Management/Management Representative

Communication mainly refers to the communication of information received from Senior Management and external parties regarding safety and environment, and would usually come in the form of meetings and memos.

3.2.1.1 INTERNAL COMMUNICATION

As part of the new employee induction process, and on an **annual basis**, the Management Representative will **memo/email the NWCR QSE policies to all staff and management** to ensure staff and management are involved in determining these policies. This is also to ensure that they feel they are involved/have a voice in their own safety. Constructive feedback received from staff and management will be added to the policy and implemented accordingly.

Other methods for internal communication regarding safety and environmental protection include email, person-to-person, noticeboards, and meetings. Safety meetings at NWCR include:

- Company Inductions for all staff at commencement
- Site Inductions for Project Staff, as stipulated by the client/Senior Management
- Pre-Starts and Toolbox Talks for Project Staff, as stipulated by the client/Senior Management

3.2.1.2 CONTRACTORS AND VISITORS

NWCR treat subcontractors as employees. Visitors are therefore the main focus of this section.

Before entry into any NWCR workplace, personnel must ensure that visitors have a representative or escort from NWCR.

It is the responsibility of the escort to communicate any information required for safe passage of the visitor, and for protection of the environment, including, where appropriate, any associated Safe Work Procedures. Where possible, visitors should remain in the office or meeting areas.

The escort will shadow the visitor and be that person's point of contact for the duration of the visit.

In an emergency, it is the responsibility of the designated escort to evacuate the visitor in the safest possible manner to the designated evacuation point.

3.2.1.3 COMMUNICATION FROM EXTERNAL PARTIES

Scope: This section is relevant to receiving, documenting and responding to relevant communications from external interested parties e.g. clients and Site Representatives, emergency services, EPA, WorkSafe, etc.

Any communications from external parties will be received and addressed by Senior Management. All parties affected by the communication/visit will be notified of the outcomes and any relevant actions that need to be taken.

Records of any such communication/visits must be maintained:

- Non-conformances will be recorded in the Continuous Improvement Register and managed as per section 4.1
- Any records submitted by the external party, e.g. notices, will be retained on file

3.2.2 CONSULTATION AND PARTICIPATION

Responsibility: Management Representative/All Staff

Consultation is when management seek views from staff and other involved parties before making decisions around safe work processes and controls.

Participation is where consulted parties are involved in the decision-making around safe work processes and controls. All parties jointly identify hazards, assess risk, and identify controls to prevent injury, illness, property damage and significant environmental impacts and are generally involved in safety and environmental practices. Consultation and participation are legal requirements, and when properly implemented, safety and environmental performance will be improved.

At NWCR, consultation and participation will be implemented in the following ways:

- As per Section 3.1.1, Project Staff and Management will complete client or site inductions where required
- Risk assessments, (see Section 3.1.1) which include:
 - Staff and management will be involved in preparation and review of the SWMS and other safety documentation on-site as required
 - Personnel affected by, or within the scope of a risk assessment, are involved in the risk assessment by invitation of the assessor, or where an employee requests to participate
 - All risk assessments must be performed with an employee working in the area
 - After risk assessments and reviews, employees are invited to review the risk assessments and identify updates and changes to the risk assessments
- When there are changes to policy or procedure which affect the health and safety of staff or other parties:
 - The affected personnel are consulted
 - The views and identified hazards of affected personnel are taken into account and further changes implemented if needed
 - Typically, this process is relevant to changes in internal and external documents and changes from corrective actions
- All staff and management must report any hazards/aspects to Senior Management or the Site Representative
- **More significant hazards/aspects must also be recorded on the Continuous Improvement**
- The person reporting the hazard and the person receiving the report must take action to ensure the safety of themselves and others
- As per Section 3.1.2, staff and management will be involved in **preparation and review of the Safety and Environmental Risk Register**

Personnel, including non-managerial employees, are invited to participate, by representation or otherwise, in meetings regarding the following subjects:

- How to fulfill legal requirements
- How to control outsourcing, procurement, and contracting activities
- What should be monitored, controlled, and evaluated
- How to ensure continual improvement

Personnel, including non-managerial employees, are invited to help in the development of worker participation and consultation in the following ways:

- Determining the mechanisms for their consultation and participation
- Determining competence requirements, training needs, and evaluation methods
- Determining what needs to be communicated
- Determining adequate control measures and their effective implementation and use
- Investigating incidents and nonconformities and determining the corrective action

3.3 INCIDENT MANAGEMENT

3.3.1 INCIDENTS AND INJURIES

Responsibility: Senior Management/Management Representative/All Staff

In the event of an incident/injury, the following must be implemented as soon as possible:

1. Attend to the incident ensuring that:
 - a. All persons are safe
 - b. Adequate first aid is provided to any injured persons. Note that staff must not administer first aid beyond their capability
 - c. Relevant Emergency Services are notified as needed
2. For a significant incident, do not tamper with the incident scene unless approved by a Workplace Health and Safety or EPA Inspector or the Police unless modification of the incident scene is required to prevent suffering, minimise environmental impact, or to make the area safe
3. Notify the Management Representative of the incident by completing a **Continuous Improvement Form**. Where appropriate, the Director or delegate will **report the incident to Workplace Health and Safety** as soon as possible after the incident (i.e. for serious injury)
4. Where applicable, affected clients are notified by phone and in writing, as soon as possible after the incident
5. If medical help is required:
 - a. Relevant personnel will get the appropriate medical help and assist the injured person as much as needed
 - b. A copy of the **Doctor's Medical Certificate** will be provided to the Management Representative (if supplied)
 - c. Where relevant, the Director or delegate will complete and submit the relevant **WorkCover Claim forms** for the incident if an insurance claim is likely to be made
6. The Management Representative will **enter data into the Continuous Improvement Register** (see Section 4.1.1).
7. If rehabilitation is needed:
 - a. A Rehabilitation Coordinator will be selected by the Director or delegate
 - b. A return-to-work program or alternative duties will be determined in conjunction with medical professionals, the insurance company, the injured worker, and the Rehabilitation Coordinator
 - c. The Rehabilitation Coordinator will regularly monitor rehabilitation progress and help to ensure a safe return to work as soon as possible.

Incidents will be reviewed without undue delay by Senior Management. Where there is a need for further action, actions will be determined as per Section 4.1.2.

3.3.2 NOTIFIABLE INCIDENTS

A Notifiable incident, as described in the applicable Work Health and Safety Acts in each State or Territory, includes the death of a person, serious injury, or dangerous incident. The definitions of Serious Injury and Dangerous Incidents are described below:

SERIOUS INJURY OR ILLNESS	DANGEROUS INCIDENT
A person requiring immediate treatment as an in-patient in a hospital	Uncontrolled escape, spill, leak of any substance
A person requiring immediate treatment for:	Uncontrolled implosion, explosion, or fire
Amputation of any body part	Uncontrolled escape of gas or steam
Serious head injury	Uncontrolled escape of pressurized substance
Serious eye injury	Electric shock
Serious burns	The fall or release from a height of any plant, substance, or object
De-gloving or scalping (separation of skin from underlying tissues)	Collapse, overturn, failure, malfunction, damage to plant required to be authorized for use
Spinal injury	Collapse or partial collapse of a structure
Loss of function of any body parts	Collapse or failure of an excavation or shoring equipment
Serious lacerations	Inrush of water, mud, or gas in workings in an underground excavation or tunnel
A person requiring medical treatment within 48 hours of exposure to a substance, Loss of consciousness	Interruption of the main system of ventilation for underground tunnel or excavation
Any other illness prescribed by the Regulations	Any other even prescribed by the Regulations

3.4 EMERGENCY MANAGEMENT

Scope:

An emergency is any incident outlined below that requires immediate action to make safe:

- Any actual incident that has the capacity to cause death or serious harm
- Any potential incident that has a high probability of causing death or serious harm
- Any actual or potential incident that has a high probability of causing harm to the environment or property

General Emergency Response Procedure:

1. Stop work/operations
2. CALL 000 (112 MOBILE)
3. State type and scale of emergency
4. State site/ location name
5. Number of casualties, if applicable
6. Hazards that may be involved, such as chemicals or fuel
7. Specific access location on site, e.g. street access/side entrance
8. Provide contact name and phone number
9. Answer all questions and follow instructions given by the emergency operator
10. DO NOT HANG UP UNTIL INSTRUCTED
11. Check for hazards (danger) to yourself and others
12. Apply first aid - D.R.S.A.B.C.D. (to level of your competency)
13. Continue first aid until help arrives, or for as long as is practicable

3.4.1 OFFICE EMERGENCY MANAGEMENT

Responsibility: Management Representative

Scope: Potential emergency situations relevant to NWCR include fire and flood only

The NWCR **Emergency Plan will be placed prominently in the office** for all personnel and visitors to refer to. The Emergency Plan will be **reviewed by new employees during the induction**.

Emergency plan training will be undertaken annually. **The Emergency Plan and evacuation training results will also be reviewed annually** as part of the Management Review Meeting (see Section 4.6).

3.4.2 SITE EMERGENCY MANAGEMENT

Responsibility: Site Management

All staff working at a client's site will comply with the emergency management procedures for that site. Normally staff and Management attending client sites will be trained in the emergency procedures during the site induction or safety meeting.

3.4.3 FIRST AID AND FIRE EXTINGUISHERS

Responsibility: Management Representative

All workers will be provided access to first aid equipment and trained first aid personnel. An appropriate number of first aid personnel will be available at all times, with consideration of:

- Number, location, and content of equipment
- First Aid procedures
- Number of required trained personnel (including access for subcontractors as needed)
- Signage
- No first aider will attempt first aid beyond their training or experience.

(Refer to the relevant Australian Standards and WHS Regulations for further information)

In accordance with State Government regulations, first aid and fire extinguisher requirements are met as follows:

- **Up to date first aid kits** are to be available **in the office**
- **Up to date first aid kits and fire extinguishers** are to be available **in relevant company vehicles**
- **Compliance tests for fire extinguishers** are **completed by a qualified third party on a biannual basis**
- The Management Representative is **responsible to check for:**
 - **Expiry dates and contents of first aid kits in the office, and relevant company vehicles**
 - **Expiry dates of staff First Aid Certificates**
 - **Fire Warden requirements for projects**

3.5 MONITORING AND MANAGEMENT

3.5.1 COMPLIANCE MONITORING

Responsibility: Management/Supervisors/Management Representative

Compliance monitoring is the responsibility of all Management, Supervisors, and the Management Representative to ensure all work is being performed in accordance with the designated control measures from the SWMS and Safety and Environmental Risk Register. The Management Representative should be updated for any noteworthy breaches/non-conformances. **These will be entered into the Continuous Improvement Register** (section 4.1).

Also, the **responsibilities for monitoring** the controls from the SWMS and Safety and Environmental Risk Register have been **recorded on those documents**. Breaches of controls will be actioned by the responsible person/s as stated above.

Workplace Inspections are conducted at least monthly **for each project over 30 days in duration, or at least biannually for a selected site, using the Workplace Inspection Checklist, the results of which are discussed during the Management Review Meeting.**

Furthermore, the Management Representative will perform an **audit** using the **Safety and Environmental Risk Register** on at least an **annual basis**. If any breaches of the control measures in the Register were identified during the audit:

- Appropriate corrective action will be determined by the Management Representative and the relevant persons will be notified. The breach/issue will be logged in the Continuous Improvement Register
- The Management Representative will monitor implementation of the corrective action and reinspect the area being monitored (or receive confirmation of implementation from the relevant Supervisor)
- Upon resolution of the issue, the results are recorded in the appropriate section of the Continuous Improvement Register
- The breaches or issues from the audit are reviewed in the Management Review Meeting (See section 4.6). Any further corrective actions are recorded in the Continuous Improvement Register as per section 4.1.2.

3.5.2 HEALTH SURVEILLANCE

Responsibility: Management Representative

Currently there are no regulated ongoing health surveillance requirements for NWCR. If a need for health surveillance arises, e.g. blood or noise monitoring:

1. An external service provider will be selected and engaged
2. Relevant action will be considered and undertaken e.g. making changes to the SWMS or other internal documentation and practices
3. Access to health surveillance records will be limited to Senior Management, Management Representative and the individual that was undergoing testing

3.6 SAFETY & ENVIRONMENTAL MANAGEMENT - RELATED DOCUMENTS

The following documents are used in conjunction with this section of the NWCR QSEMS to ensure its effective implementation and operation:

DOCUMENT NAME	LOCATION
Workplace Inspection Checklist	Company Drive\06_Resources\02_Forms&Checklists\NWCR - Workplace Inspection Checklist.docx
Subcontractor Safety Checklist	Company Drive\06_Resources\02_Forms&Checklists\NWCR - Subcontractor Safety Checklist.docx
Equipment Calibration Register	Company Drive\03_Plant\Asset Register 2025.xlsx"
Employee Induction Checklist	Company Drive\06_Resources\02_Forms&Checklists\NWCR - Employee Induction Checklist.docx"
Safety & Environmental Risk Register	Company Drive\07_Safety\NWCR - Safety & Environmental Risk Register.docx"

SECTION 4: SYSTEM MANAGEMENT PROCEDURES

4.1 NON-CONFORMANCES AND CONTINUOUS IMPROVEMENT

4.1.1 NON-CONFORMANCE REPORTING

Responsibility: All staff/Management and the Management Representative

1. After an issue has been identified e.g. supplier issue, procedural non-conformance, client complaint, potential non-conformance, late completion etc., the issue should be corrected as soon as possible
2. The staff member or Manager reports the actual (or potential) issues to the Management Representative by **completing the Continuous Improvement Form** or verbally, who enters the issue and immediate actions taken into the **Continuous Improvement Register** under one of the following categories:

QUALITY	SAFETY/ENVIRONMENTAL
• Administrative Error	• Breach of Safety/Environmental Controls
• Audit Finding – Internal/External	• Emergency Evacuation/Test
• Client Complaint	• Environmental Aspect
• Client Compliment	• Hazard/Risk
• Damage to Property	• Incident or Accident
• Defect After Final Inspection	• Legal Notices Including WHS and EPA
• Late Completion	• Near Miss
• Lesson Learned	•
• Organisational Risk/Opportunity	•
• Potential Non-Conformance	•
• Procedural Non-Conformance	•
• Quoting Error	•
• Suggestion	•
• Supplier/Subcontractor Issue	•
• Training Issue/Evaluation	•
• Workmanship Issue	•
• Other	

Note: If you change the above categories, you must also change them on the Continuous Improvement Form, Continuous Improvement Register and Management Review Meeting Agenda

4.1.2 REVIEW OF NON-CONFORMANCES AND CONTINUOUS IMPROVEMENT

Responsibility: Management Representative

1. On at least a monthly basis, the Continuous Improvement Register will be reviewed. It is also reviewed formally on a biannual basis during the Management Review Meeting (See section 4.6)
2. If no further corrective/preventive action is to be taken, **“No”** is selected in the Register
3. If further corrective/preventive action is needed, **“Yes”** is selected on the Register and corrective/preventive actions are recorded on the Register:
 - a. Appropriate corrective or preventive action is determined and **recorded on the Register** and a deadline is identified if able
 - b. Actions are implemented by the designated person
 - c. The **results of the actions are recorded** in the “Results” column of the Register

Personnel affected by corrective/preventive action are determined in consultation with the person reporting the incident and Senior Management. If those nominated dispute the allocation of action assigned to them, they must raise it with Senior Management.

The **action is closed out on the Register** and dated when Senior Management are confident the likelihood for occurrence/re-occurrence of the issue has been reduced effectively or the issue has been resolved.

4.2 DOCUMENT CONTROL

4.2.1 INTERNAL DOCUMENT CONTROL

Responsibility: Senior Management/Management Representative

Scope: Includes the QSEMS and any associated template documents and forms

The master versions of all internal documents are the electronic versions located in the **Master Documents folders in Microsoft 365**. All documents in these folders will be **protected in the appropriate manner** for the document e.g. Read Only, PDF etc.

All internal documents must be reviewed and approved by Senior Management before. Access by staff to the Master Documents folders will be **limited via password policies**.

When a document needs to be changed:

1. **Suggested changes are communicated** to Senior Management
2. Senior Management reviews and gives approval of the suggested changes
3. Once approved, a copy of the redundant document is saved into the relevant **archive folders** where appropriate, else version histories are maintained in Microsoft 365
4. The Management Representative or delegate makes the necessary changes to the document, including any working copies found in other locations/platforms, and updates the document details, including **date and version number**
5. Relevant personnel are **notified of changes appropriate to them, preferably via email**

Note: Internal documents relating to Quality, Safety, and Environment are reviewed as a part of the internal audit (Section 4.5).

4.2.2 EXTERNAL DOCUMENT CONTROL AND LEGAL REQUIREMENTS

Responsibility: Management Representative

Scope: external documents include relevant standards, codes of practice and legislation NWCR must be compliant with

NWCR is notified of changes to standards, codes of practice and legislation by applicable subscriptions (such as StandardsWatch and WorkSafe), websites, suppliers, and other notifications to ensure that all work abides by the most current standards available. **A Compliance Register is also maintained.**

Upon notification of a change, the Management Representative will review the updated standards, codes, or legislation. Any areas of non-compliance will be resolved as soon as possible, and any requirements implemented. The **current versions of all standards, codes and legislation are the applicable online source, as listed in the Compliance Register**, and where necessary, kept electronically in the Master Documents folder or filed in hardcopy form. Any held obsolete versions of the standards, codes or legislation will be marked as superseded and kept as history if appropriate or recycled/deleted. In all cases they are to be replaced by the current versions.

Where changes affect internal documentation or practices, internal documentation will be updated as per section 4.2.1 and the **relevant staff notified of the changes by email as appropriate.**

4.3 RECORDS CONTROL

Responsibility: Management Representative

Scope: This section is relevant to NWCR records for example Accounts, client records, personnel records, meeting minutes, internal audits, non-conformances, communications, etc.

4.3.1 HARDCOPY RECORDS

Responsibility: Management Representative/Senior Management

NWCR endeavour to keep only electronic records where possible, with the exception of some site and safety records. Any **critical hardcopy records produced as part of operational processes are digitised.**

4.3.2 ELECTRONIC RECORDS

Responsibility: Management Representative

All staff and Management should **work within the relevant shared network resource (Microsoft 365, Xero etc.) and not hold important company documents or records on individual computers.**

The shared network resources contain all company documents and records not found in hardcopy. This includes financial data, client data, email, and management material. Electronic records will be maintained for a minimum of 5 years, with the following provisions:

- **The primary source of important company documents or records must not be kept on individual computers**
- **Records** not managed directly by nature of the resource are **labelled thoughtfully according to contents**
- Sensitive records (employee, financial etc.) are restricted to those with specified access
- After the expiry time above, records disposal must be approved by Senior Management (unless the record is still current e.g. personnel records)
- Once approved, all obsolete records are to be destroyed
- Once approved, all **obsolete records of a sensitive nature are to be destroyed securely**
- Duplicate or draft records may be destroyed without approval at the user's discretion, particularly if there is a complete electronic record available
- All company data is **backed up on an ongoing basis to ensure redundancy**

4.3.3 TABLE OF RECORDS

IDENTIFICATION	STORAGE	PROTECTION	RETRIEVAL	RETENTION	DISPOSITION
Accounts & Tax	Electronic in Xero. Any hardcopy transferred to electronic	Network Access	Admin Team	5 Years	Destroy securely
Human Resources Policies	Electronic in Microsoft 365	Network Access	All Staff	Reviewed Yearly	Outdated versions stored in superseded folder
Client/Project Data	Electronic in Microsoft 365	Network Access	Senior Management & Project Staff	5 Years	Destroy securely
Communications Relating to Projects	Electronic in Microsoft 365	Network Access	Senior Management & Project Staff	5 Years	Destroy securely
Employee	Electronic in Microsoft 365	Network Access	Management Representative & Admin Team	Indefinitely	NA
Meeting Minutes	Electronic in Microsoft 365	Network Access	All Staff	Indefinitely	NA
Company Policies, Internal Audits & Non-conformances	Electronic in Microsoft 365	Network Access	All Staff	Indefinitely	NA

4.4 HUMAN RESOURCES

4.4.1 RECRUITMENT AND SELECTION

Responsibility: Senior Management

When the need for a new position has been identified and approved by Senior Management, the following activities then occur:

1. Selection criteria are determined based on role, and generally include:
 - a. Relevant qualifications, licenses, and tickets
 - b. Skills and experience in the industry
 - c. Strong work ethic
 - d. Fit into the NWCR culture and ability to take instructions/work as part of a team
2. Applicants are identified by appropriate methods, and they are contacted for an interview (formal or informal, depending on role) with Senior Management to determine suitability
 - a. Applicants best meeting the above criteria are subject to **relevant checks**
 - b. Successful candidates are offered employment via a **Letter of Offer**
3. If the applicant accepts the offer:
 - a. The **Letter of Offer**, which includes **key terms and conditions of employment**, is **co-signed**
 - b. Company and client inductions are conducted to requirement
 - c. As part of the induction process, Senior Management provides the employee with necessary training and documents, including the **Fair Work Statement**, company policies and relevant sections of the NWCR QSEMS
 - d. The **Employee Induction Checklist is completed and signed**
 - e. An **employee file is set up**, and **copies of the relevant qualifications/training, licenses** and other relevant documentation are filed therein
 - f. The **Skills Matrix is updated accordingly**
 - g. A 6-month probation period commences, or as contractually specified
 - h. Any further on the job training and monitoring is performed by the appropriate Manager as per section 4.4.2 below

Note: A review of relevant sections of the NWCR QSEMS, including benefits of improved performance and implications of non-compliance, is conducted at least annually with all employees during the annual Staff Meeting.

4.4.2 FURTHER TRAINING

Responsibility: Senior Management/Management Representative

Senior Management determines the necessary competence for each employee, appropriate to the work being carried out. Relevant on the job training is provided by the employee's Supervisor as needed e.g. in consequence of an incident. Management approval or records are not usually required for on-the-job training.

If further external training/qualifications are required or requested by an employee:

1. The training must be approved by Senior Management
2. Training dates are arranged with the staff member and the training organisation
3. **Training records are kept** in the employee's file, and the Skills Matrix updated accordingly

Management will evaluate the effectiveness of training performed. Any significant concerns or feedback will be reported back to Management for further action and inclusion in the Continuous Improvement Register.

4.5 INTERNAL AUDITS

Responsibility: Management Representative

Scope of internal audits:

- **Internal audits of the complete NWCR QSEMS will be performed annually (prior to the annual certification audits) and as needed according to the Internal Audit Schedule below**
- Additional audits of individual sections may be conducted taking into consideration:
 - The importance of the processes concerned
 - Changes affecting the organisation
 - The results of previous audits
- Internal audits are performed by internal personnel, as selected by Senior Management
- Internal auditors must be trained using the information listed below
- Internal auditors should be as independent as possible of the process being audited and should not audit their own work in order that objectivity and impartiality is maintained

4.5.1 INTERNAL AUDIT SCHEDULE

SECTION OF QSEMS	MONTH											
	JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC
SECTION 1						X						
SECTION 2						X						
SECTION 3						X						
SECTION 4						X						

4.5.2 PREPARING INTERNAL AUDIT WORKSHEETS

When auditing the QSEMS, audit worksheets are prepared either by creating electronic audit worksheets (editable pdfs or word docs) or by printing hard copy worksheets. To create the hardcopy worksheets, the person preparing the worksheets will:

1. Open the latest version of the QSEMS as a PDF in Adobe Reader
2. Print the entire QSEMS in landscape orientation with a custom scale of 65%. This shrinks each page of the QSEMS to the left side of an A4 page in landscape, and allows room on the righthand side of the page for audit notes and comments
3. Multiples of the same page may be necessary for printing if multiple sections fall on the same page within the QSEMS and are being audited by different auditors

Note: In each section of this manual, potential audit criteria / questions have been bolded as a guide, however the auditee may also provide valuable insight into what is relevant audit criteria. Audit criteria are the sighted evidences in a procedure (usually records) that show that important steps are being performed.

4.5.3 PERFORMING THE INTERNAL AUDIT

Once worksheets are prepared, the auditor can begin the internal audit of the QSEMS using the following procedure:

1. Management will select an auditee (someone who is regularly involved in the process being audited)
2. The QSEMS is read and reviewed between the auditor and auditee to ensure the written procedure is accurate. Additional insight on audit criteria may be noted at this point. Remember, records or crucial steps in each process or section should be audited
3. Each auditor determines compliance with the QSEMS by:
 - a. By reviewing a sample set (usually 2-5) of applicable company records (job records, quality management records, employee records, etc.) that show evidence of the process being performed.
 - b. Or, if no records or evidence exist (entire section 1 of QSEMS), the auditor can verify compliance by interviewing 1 or more employees that are directly involved with the process or section being audited. This can be done by asking simple direct questions. For example: *"Do you always call the client after receiving an order?" "Is this statement current and accurate"* (only example questions, this may not be required as part of your QSEMS process.)
4. When looking at sample records, ticking on a grid/matrix to show compliance to the audit criteria for each identified sample can be one method of recording compliance. Alternatively, writing brief sentences that mention how the identified sample(s) do or do not comply with the audit criteria may be more suitable in some cases. Any relevant notes or finding of non-compliance are recorded on the Audit worksheet. Remember to specifically identify the samples being looked at (i.e. *"PO# 4762"* or *"Project# 11237"* or *however you identify your records*)
5. All non-conformances, or updates to, the QSEMS are also noted on the Audit worksheet (changes to internal documents must be performed in compliance with section 4.2.1). Where immediate corrective action is needed, appropriate action will be taken, and the action taken will be recorded on the Audit worksheet and/or on the Continuous Improvement Register
6. At the conclusion of the audit, the **completed Worksheets are returned to the Management Representative**
7. The Management Representative enters any non-conformances from the audit into the Continuous Improvement Register, along with any action taken, and notifies relevant Managers of the improvements required
8. The results of the internal audit are reviewed, and any further corrective actions are identified and addressed as per section 4.1.2
9. Results of Internal Audits are also reviewed and discussed during the Management Review Meeting as per section 4.6.

NOTE: If reviewing employee files, sensitive personal information should be safeguarded and considered prior to reviewing these records. The auditor only needs to see that a record exists and does not need to review detailed personal information.

4.6 MEETINGS

Scope: Senior Management has ensured that appropriate communication processes have been established within the organisation and that communication takes place regarding the effectiveness of the QSEMS by way of meetings. The following are the established regular meetings held at NWCR. Additional meetings on a less formal or less regular basis are held as determined necessary by Senior Management to communicate effectively and ensure client requirements are being met.

4.6.1 MANAGEMENT REVIEW MEETING

Responsibility: Senior Management/Management Representative

The Director and invited will review the effectiveness of the QSEMS on **biannual basis** (or more often as necessary) using the sources of information documented on the Management Review Minutes form. This includes requirements for strategic planning, including organisational context, interested parties and their requirements, and risks and opportunities by way of a SWOT analysis.

Minutes from the Management Review Meeting will be kept on the Management Review Meeting Minutes Form. New actions determined necessary as a result of the Management Review are **added to the Continuous Improvement Register** for completion and monitoring.

4.6.2 STRATEGIC PLANNING

Responsibility: Senior Management/Management Representative

As part of the Management Review Meeting, on an annual basis (and more often as necessary), the Director and invited will determine, monitor, and review external and internal issues that are relevant to its purpose, context, and strategic direction, and that affect its ability to achieve the intended result of the QSEMS. Topics generally include the following as required:

- Context of the organisation
- Interested parties and their requirements (Stakeholder Needs)
- Positive and negative factors or conditions (internal and external) for consideration
 - External issues: arising from legal, technological, competitive, market, cultural, social, and economic environments, whether international, national, regional, or local
 - Internal issues: related to values, culture, knowledge, and performance of the organisation
- Identification and treatment of risks and opportunities

Minutes from this meeting are kept by Senior Management on the **Management Review Meeting Minutes Form. New actions** determined necessary as a result of the Strategic Planning Meeting are **added to the Continuous Improvement Register** for discussion, completion, and monitoring in the Management Review Meeting

4.6.3 ANNUAL STAFF MEETING

Responsibility: Senior Management/All Personnel

Topics include:

- Review the current company policies and objectives
- Discuss how each individual can impact the achievement of the objectives and client satisfaction
- Review any updates or changes to the QSEMS including:
 - Roles/responsibility changes
 - Procedural updates
- Review all relevant safety and environmental practices, including a review of the Safety and Environmental Risk Register
- Ideas for improvement, Q&A, etc.

4.7 SYSTEMS MANAGEMENT PROCEDURES – RELATED DOCUMENTS

The following documents are used in conjunction with this section of the NWCR QSEMS to ensure its effective implementation and operation:

DOCUMENT NAME	LOCATION
Continuous Improvement Form	Company Drive\06_Resources\02_Forms&Checklists\NWCR - Continuous Improvement Form.docx
